Manufacturer of Pneumatic and Hydraulic Tools

## PRODUCTION LINE TOOLS FOR THE AUTOMOTIVE INDUSTRY

HOSE CLAMP TOOLS, SNAP RING TOOLS, HINGE PIN INSERTION

### SM-200

Double wire clamp tool.

Accepts up to 1.50" clamp

### SM-300

Constant tension band clamp tool.

Accepts up to 2.44" clamp. Light weight.

### SM-350

Single wire clamp tool.

Accepts up to 2.68" clamp.

**SIMONDS INC.** is a leader in developing pneumatic tools for the automotive, industrial and electronics manufacturing production lines. Along with a standard line of cutters, crimpers and hose clamp tools, **SIMONDS INC.** will work with your engineers and production line managers to develop tools specific to your needs.

**SIMONDS INC.'s** team of engineers has worked with many of the major automotive companies to design tools for degating sprus on bumpers, inserting hinge pins on car doors and tightening Oetiker™ clamps.

This tool was designed to crimp close the clamp on an axle. This pneumatic tool helped to reduce strain that occurred from using a standard hand tool.

(Pictured at right and below)

“E” clip tool eases insertion of clips. Tools such as this will increase production and reduce constant repetitive motion.

**SIMONDS INC.** insert heads can be adapted for “E” clips up to 3/8” diameter.

(Picture at right)

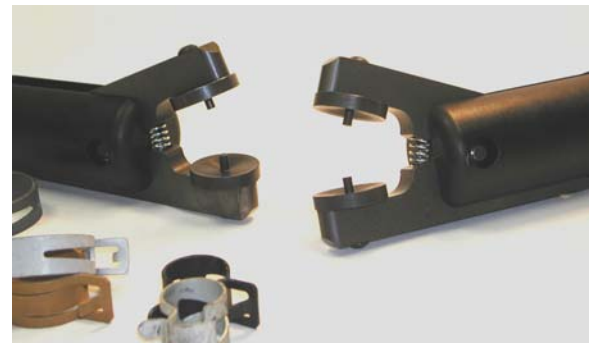

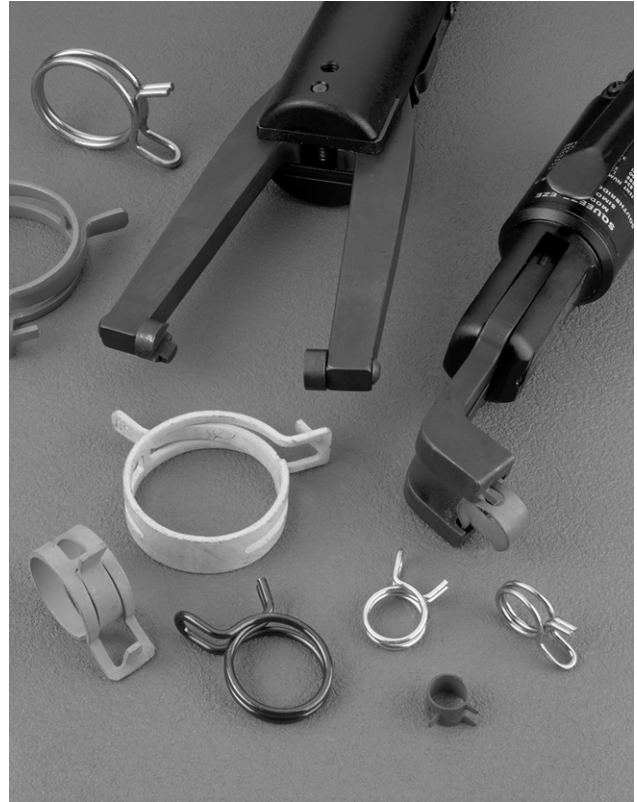

Developed to speed up the process of installing clips on lock tumblers, this **SIMONDS INC.** tool can be modified to fit hard to handle clips.

(Picture on left)

See live action of some **SIMONDS INC.** tools at:  
[www.youtube.com/simondsinc](http://www.youtube.com/simondsinc)

Along with the standard line of hose clamp tools, **SIMONDS INC.** has developed other tools for inserting hose clamps. Made in the **U.S.A.**, these tools were developed to meet the needs of a specific situation. Straight heads, angled heads, long heads, wire clamps...**SIMONDS INC.** can make the right tool to fit the job.

Seen above is a tool developed to close Oetiker™ clamps.

Not only does **SIMONDS INC.** develop hose clamp tools, but we also have tools for snap rings. Below left is pictured our standard SR-100 snap ring tool. To the right is a special snap ring tool developed specifically for an end user.

**U.S.A.**

# INNOVATION, IMAGINATION, *SIMONDS INC.*

PINDRIVER™ is a tool that *SIMONDS INC.* has developed in conjunction with the largest automotive manufacturers in the world. Made for automotive hinge pin installation and removal.

The PINDRIVER™ fits easily in to the production line, reducing typical injuries occurring from manual hinge pin tools. The PINDRIVER™ also helps to reduce damage to vehicles.

PINDRIVER™ tools can be engineered for tailgate, side door and window hinge pin applications.
