WHY MAKITA® CORDLESS?

INNOVATIVE CORDLESS TECHNOLOGY

Makita designs and manufactures innovative cordless tools utilizing the latest advanced technology that allows professionals the ability to use cordless tools on tasks previously thought to be impossible. Our goal in designing manufacturing & assembly cordless tools is to break away from the historical method of costly air hose operation and allow the operator freedom with a powerful, accurate and ergonomic solution.

Makita's launch of the Torque-Tracer wireless data communication tools add additional value within the manufacturing environment by providing features with improved Quality Assurance methods. Torque-Tracer's ability to capture fastening characteristics adds a traceability and communication component to quality management with subsequent gains in productivity.

REDUCED ENERGY COSTS

Less Energy Consumption needed to power cordless tools than to power pneumatic tooling.
Extreme Energy Savings by eliminating air line and air tool leakage.
Higher Quality Control by reducing damage to manufactured products often caused by hoses and cords.
Reduced Operating Costs and down time by eliminating oilers and oil maintenance.
Reduced Maintenance Costs by minimizing down time to repair damaged products.

MORE FREEDOM

More Flexibility to roam from one workspace to the next
Greater Access and Maneuverability in confined workspaces and inside closed compartments
Increased Efficiency with the ability to interchange tools from one application to the next
Easier to Reposition Fastening System when assembly lines need to be rerouted, expanded or eliminated
Quicker Recoveries from power interruptions

SAFER WORKPLACE

Reduced Hazards caused by air hoses laying across floors or hanging from ceiling
Lighter Weight with Ergonomic Design for operator control
Lower Vibration and Noise for operator comfort
Environmentally Friendly low toxicity battery platforms

BRUSHLESS MOTOR

UP TO 50% LONGER MOTOR LIFE

The Makita-built brushless motor eliminates carbon brushes, enabling the motor to run cooler and more efficiently for longer life. The electronically-controlled brushless motor efficiently uses energy to match torque and RPM to the changing demands of the application.

LOW-REACTION TECHNOLOGY

BENEFITS

Dramatically reduces repetitive motion stress experience when operating clutch-based tools within assembly facilities. Reduces cumulative wrist strain, operator fatigue, lowers the instance of injury caused by repetitive fastening tasks, and can reduce company healthcare costs related to repetitive motion stress.

TECHNOLOGY

Clutch components utilizing proprietary, patented technology significantly reduces the "kickback" experienced once final torque is applied by clutch tooling. Available as a retrofit to existing BFT, BFL*, and DFT** Series Makita clutch tools, or included as OEM component on new tools.

*Available for BFL300FZ, 301RZ, 400FZ, and 402RZ models.
**Available for DFT085FMZ and 127FMZ models

BRUSHLESS PROGRAMMABLE SCREWDRIVERS

PRECISE TORQUE CONTROL SCREWDRIVERS

Lightweight and Ergonomic

Only 6-3/4" in length and weighs only 2.4 lbs. with battery
(DFT023FMZ and DFT045FMZ models)

Built-In L.E.D. Light

Illuminates work surface for better visibility in low light environments

Brushless Motor

Makita-built motor technology provides higher speeds and advanced monitoring

Lithium-Ion Battery

For extended run time and total lifetime charge cycles

Audible Signal

For incomplete or bad fastening

DFT045FMZ

14.4V Lithium-Ion Brushless Cordless 1/4" Hex Screwdriver
(Battery not included)

Color-Coded Identification Plate
With unique I.D. number

Large Pass/Fail L.E.D.
Indicates sufficient and insufficient fastening achievement and audibly alerts operator to failed fastenings

6-Phase Rundown Programming
RPM and Directional programming via USB port for multi-stage rundown control. Provides better quality fastening and assists in cross-thread detection.

MAINTENANCE MODE

- Included software has the ability to pre-program a maintenance cycle
- Tool notifies operator at maintenance interval for calibration and/or preventative maintenance needed

SMART SYSTEM

Auto Battery Shutoff

- Shuts off the tool when battery capacity is less than 5%
- Ensures consistent fastening torque

PASS/FAIL L.E.D. LAMP

Large Pass/fail lamp indicates sufficient and insufficient fastening achievement and audibly alerts operator to failed fastenings.

RPM & DIRECTIONAL PROGRAMMING

RPM and Directional programming via USB for multi-stage rundowns.

LITHIUM-ION BATTERY

Precision sensor informs operator of insufficient battery charge level through visual and audible indicators.

BRUSHLESS MOTOR

Makita-Built motor technologies provide higher speeds and advanced monitoring.

BUILT-IN L.E.D. LIGHT

Built-in L.E.D. light illuminates work surface for better visibility in low light environments.

TORQUE ACCURACY

"Real World" accuracy has earned certification within major Automotive and Aerospace Assemblers achieving repeatability within 4% of mean torque.

ASSEMBLY PISTOL SCREWDRIVERS

PRECISE CONTROL SCREWDRIVERS

Torque Set Window
Allows the operator to view the desired torque setting

Color Coded ID Plate
For easy tool and application identification

Rubber Chuck Cover
Protects the workpiece

"Quick-Change" 1/4" Hex Chuck
Accepts standard 1/4" hex bits

Built-in L.E.D. Lamps
Illuminates the work surface for better visibility in low light environments

Forward/Reverse Switch
Conveniently located for increased comfort and efficiency

Large On/Off Switch
Equipped with a delayed re-start

Nut and Bolt Construction
Allows repeat disassembly, preventing damage to the housing

Anti-Slip Dimpled Grip
Provides comfort and operator control

Smooth Shut-Off Operation
Once preset torque is achieved, the clutch activates, automatically halting applied torque

Externally Accessible Brushes
Allows for easy service replacement and extended motor life

Two-Piece d-28R Motor
Replaceable armature and powerful rare earth magnet

Pass/Fail Indicator Lamp & Audible Signal
Provides operator with immediate feedback on fastening achievement

High Performance DEBR

BFT126FZ
14.4V Lithium-Ion Cordless 1/4" Hex Screwdriver
(Battery not included)

Utilizing ISO5393 Standards
All BFT Series models provide Cm ratings > 1.67

Torque Accuracy
+/- 10% with Cm ≥ 1.67

USER-FRIENDLY ELECTRONIC CONTROLS

- Soft start to suppress reaction and allow for smooth fastening
- One-second restart delay minimizes the potential for operator double-hits
- Delayed restarter controls the motor so that it doesn't start until one second passes after a screw has been driven; the motor does not start even if switch trigger is pulled
- Reduces deviation from pre-set fastening torque caused by unintentional over-tightening environment

REPETITIVE ACCURACY

- Torque Accuracy**
- Long-life clutch provides consistent operation within +/-10% of mean torque with real-world repeatability consistencies within +/-4%.

SMART SYSTEM

- Auto Battery Shutoff**
- Shuts off the tool when battery capacity is less than 5%.
 - Ensures consistent fastening torque.
- Indication Lamp and Audible Alert**
- Precision sensor indicates fastening sufficiency and battery power conditions with light and/or audible alert.

ADVANCED TECHNOLOGY

Two-Piece D-28 Motor

- Replaceable armature allows greater serviceability.
- Dual sealed ball bearings for less friction and greater efficiency.
- High performance fan reduces temperatures and increases tool life.
- High-grade magnet generates maximum performance.

LOW OWNERSHIP COST

Designed for High Endurance Applications

- Nut and bolt housing assembly ensures long term housing integrity.
- Replaceable brushes easily accessed without the need to open the tool housing.
- Solder-less internal components for easy and fast replacement.

BALANCING/TETHERING

- Conveniently placed threaded holes on the top and side of tool allow for easy balancing or tethering in your workstation application.

BUILT-IN L.E.D. LIGHT

- Built-in L.E.D. light illuminates work surface for better visibility in low light environments.

TORQUE TRACER

SMART TOOLS PROVIDING QUALITY ASSURANCES VIA WIRELESS COMMUNICATION

- Identifies multiple fastening characteristics for each rundown
- Flexible systems conform to a broad variety of environments
- Maintains cordless freedom of operator benefits while improving quality assurance best practices
- Provides an energy efficient alternative to pneumatic platforms involving verifiers/qualifiers
- Adds traceability measures in environments wanting cordless flexibility and safety
- An alternative to expensive DC electric tool platforms
- Uses Bluetooth frequency spectrum and Adaptive Frequency Hopping to assure an interference-free environment

- "Quick Change" 1/4" Hex Chuck
- Long-life Clutch for High Repeatability
- Auto-Stop Fastening Functioning
- Built-in L.E.D. Lamps
- Makita-Built Brushless Motor
- Slim-Line Anti-Slip Dimpled Grip

TOOL RECOGNITION

- Fastening torque values
- Fastening angle values
- Rundown rotations
- Tool ID recognition
- Time/date snap
- OK-NOK parameter achievement
- Batch achievement

PROGRAMMING INTERACTIVITY

- Torque value tolerance range
- Angle value tolerance range
- Rundown rotation min/max settings
- Tool lock down mode
- Tool brake option
- Soft start adjustment
- Calibration ability
- Batch management (PLC-based)
- Log all data from tool recognition

PROGRAMMABLE SHUT-OFF IMPACTS

EXTRA-COMPACT DESIGN

Rubberized Bit Sleeve
Protects workpiece from scratches and damages

Single L.E.D. Job Light
With preglow and afterglow functions

Easy-to-Pull Trigger Switch
With a 6mm short stroke is ideal for assembly and manufacturing applications. Minimizes operators hand and finger fatigue in long, continuous operation in assembly and manufacturing applications
