

pick // plank

UNEX's easy-to-mount **Pick-Plank** offers a simple solution to making your partial pallet storage come alive. The ability to pull SKUs forward creates improved visibility, ergonomics, and safety for your workforce. The reduction in beam level clearance creates over 40% more space.

**Improve ergonomics.
Reduce back injuries.
Maximize storage density.**

Applications

Use for partial pallet positions to increase space utilization and pick accessibility for your workforce.

Features

- All steel construction for maximum durability
- Retrofits to any GMA pallet
- Made in the USA
- Solid carrier surface allows for optimal pick of typically unconveyable products.
- Roller bearing plank minimizes pulling effort to just 3%.
- Self-locking handle stabilizes loads during transportation.

Benefits

Sliding plank allows the rear half of the load to move forward.

- Pick products faster and more ergonomically with minimal reach.
- Reduce back injuries due to awkward and strenuous picks.
- Eliminates the need for entry clearance which helps maximize storage density.

Specifications

- Fits any standard 40" x 48" pallet
- Galvanized steel construction
- 1,500 lb capacity
- Available in LH or RH configurations
- Pallet optional

Pick **Smarter.**
Pick **Better.**
