CompacLift™

X SERIES SCISSOR LIFT TABLES

Bishamon®

Bishamon X-Series Scissor Lift Tables are rugged, compact hydraulic lifts with capacities of 440 to 1,650 lbs., travel distance up to 45 in. and platform sizes from 18 x 25.5 to 20 x 40 inches.

X Series CompacLift™ tables are most widely used in machine tool or other production line manufacturing activities requiring heavy-duty lifting and positioning within a confined area. With additional emphasis placed on ergonomics and the reduction of repetitive lifting activities by the manufacturer, The X-Series meets an ever-growing need for lifting assistance.

Basic design features a manual foot pump operation to afford the opportunity of economical solutions to lifting problems. Electric/Hydraulic and Air/Hydraulic units are also available in most capacities.

CompacLifts™ are designed and manufactured to extend the work area of machine tool activities and production lines. They also increase productivity and reduce worker strain by positioning materials at optimum operating heights for worker efficiency.

X Series Lift Tables are available in five capacities, four table sizes and single or double scissors.

All Bishamon Lift Tables are designed and constructed for lifting applications under the toughest working conditions, offering years of trouble-free operation.

X SERIES SCISSOR LIFT TABLES

Working Harder To Make Your Life Easier

X Series Scissor Lift Table Dimensions

Standard Features

- Compact design
- Manual, electric and air operated models available
- Constructed with heavy-gauge steel and sturdy welds throughout
- Steel work platforms
- Entrapped rollers for increased stability
- Superior hydraulic systems proven on a range of Bishamon lift products
- Hand control on electric models
- Removable & storable operator's foot pedal and lowering control on manual models
- Wide range of table sizes
- Quality baked enamel finish
